Warranty Coverage

Popcycle is committed to ensuring satisfaction with your new vehicle. To help keep things in proper working order, Popcycle will warrant each 2012 model year bike, for any obvious factory defect for the first 90 days... This includes replacement parts and labor at the repair shop we agree to use in cooperation with you; the vehicle's original owner (unless the failed part is easily replaced by our owner). And of course we will look carefully at any issues that arise beyond that 90 days if we determine the factory to be at fault. Parts replacement (not labor) of the Electric Drive Motor and the Controller are covered for 2 years regardless of mileage – but we will not cover problems that arise from misuse including submersing in water or other abuses. The frame is under warranty for ten (10) years. (Warranty from date of purchase).

What Is Not Covered

Tires, Light Bulbs & Brake Pads and any damage that may occur during the course of normal use. All the above items are not covered for damage due to accident, misuse, alteration, insufficient or improper maintenance, contaminated or poor-quality lubricants or environmental and chemical exposure.

Other Conditions

We reserve the right to retrieve any damaged component that we replace to help us study the reason for the failure and to improve our product. Of course this would be at our expense.

Warranty coverage starts at the time of delivery. Please register with your Popcycle Salesperson or on the web site www.pmco.com
